Opinions are divided on whether we should share as much information as possible across all fields. Some believe sharing that kind of knowledge online will lead to global development, whereas others claim that some information is not suitable for free sharing. One common reason people share resources is to make them more convenient to use. Due to the Internet, if we update the knowledge on our blogs, everyone can find it immediately. Also, for the second reason, they may believe information in science research, Business, and so on contributes to improving society around the world. That is, people can easily seek out the knowledge they want and use it to modify their prototype.↵
